                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         GENERAL INFORMATION:
APPLICANT: Lex M. Cowsert
TITLE OF INVENTION: ANTISENSE MODULATION OF G-APLHA-11 EXPRESSION
FILE REPERINCE: RTS-0030
CURRENT APPLICATION UNBER: US/09/205,922
CURRENT FILING DATE: 1998-12-04
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         .

Sequence 37, Application US/09344521

Patent No. 6100090

GENERAL INFORMATION:
APPLICANT: Lex M. Cowsert
TITLE OF INVENTION: ANTISENSE MODULATION OF PI3K P85 EXPRESSION
FILE REFERENCE: RTS-0062
CURRENT FILING DATE: 1999-06-25
NUMBER OF SEQ ID NOS: 47

LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Query Match

Patent No. 6255472;
GENERAL INFORMATION:
APPLICANT: TAKINO, Takashi
APPLICANT: NAKAMURA, Yusuke
TITLE OF INVENTION: HUMAN GENES
FILE REFERENCE: 055876
CURRENT APPLICATION NUMBER: US/09/381,681;
CURRENT FILING DATE: 2000-01-10
FEALLER PLILING DATE: 2997-03-26;
NUMBER OF SEQ ID NOS: 9
SOFTWARE: PATENTIN VEY: 2.1
ATTORNEY/AGENT INFORMATION:
NAME: Warburg, Richard
REGISTATION NUMBER: 32,327
REFERENCE/DOCKET NUMBER: 218/078
TELECOMMUNICATION INFORMATION:
TELEFHONE: (213) 955-0440
TELEFR: (7-3510
INFORMATION FOR SEQ ID NO: 2721:
SEQUENCE CHARACTERISTICS:
LENGTH: 18 base pairs
TYPE: nucleic acid

                            Sequence 86, Application US/09019160

Patent No. 6306588

GENERAL INFORMATION:
APPLICANT: Chatterjee, Deb K.
APPLICANT: Yang, Shuwei
TITLE OF INVENTION: Polymerases for Analyzing or Typing Polymorphic TITLE OF INVENTION: Nucleic Acid Fragments and Uses Thereof NUMBER OF SEQUENCES: 93
GORRESPONDENCE ADDRESS:
ADDRESSEE: STERNE, KESSLER, GOLDSTEIN & FOX, P.L.L.C
STREET: AL100 New York Ave., N.W., Suite 600
CITY: Washington
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             1.4%; Score 11.8; DB 1; Length 18; 86.7%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 4504, Application US/08584040

Patent No. 6446398
GENERAL INFORMATION:
APPLICANT: Parco, Pamela
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Escobedo, Jaime
TITLE OF INVENTION: TREATHENT OF DISEASES OR
TITLE OF INVENTION: CONDITIONS RELATED TO LEVELS
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: GROWTH FACTOR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 INFORMATION FOR SEQ ID NO: 86: SEQUENCE CHARACTERISTICS: LENGTH: 18 base pairs TYPE: nucleic acid strandedness: both
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             438 AGTCTAAAGCCAGAT 452

Sequence 87, Application US/09406064

Patent No. 6270973

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Bultz, John W
APPLICANT: Letype, Donna
APPLICANT: Letype, Donna
APPLICANT: Robert, Daniel
APPLICANT: Robert, Daniel
APPLICANT: Robert, Daniel
APPLICANT: Robert, Daniel
APPLICANT: Hartnett, James R.
APPLICANT: Hartnett, James R.
APPLICANT: Hartnett, James R.
APPLICANT: Hartnett, James R.
APPLICANT: Welch, Roy
TITLE OF INVENTION: MULTIPLEX METHOD FOR NUCLEIC ACID DETECTION
TITLE OF INVENTION: MULTIPLEX METHOD FOR NUCLEIC ACID DETECTION
TITLE OF INVENTION: MULTIPLEX METHOD FOR NUCLEIC ACID DETECTION
TITLE OF INVENTION NUMBER: US/09/406,064
CURRENT APPLICATION NUMBER: US/09/406,064
CURRENT PELING DATE: 1999-07-21
EARLIER APPLICATION NUMBER: 09/522,436
EARLIER FILING DATE: 1999-07-18
EARLIER FILING DATE: 1999-07-21
EARLIER PELICATION NUMBER: 09/042,287
EARLIER PELICATION NUMBER: 09/042,287
EARLIER PELICATION NOS: 99
SOFTWARE: PATENTIN VOS: 99

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Length 13;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                GENERAL INFORMATION:

APPLICANT SHULtz, John W
APPLICANT Lewis, Martin K.

APPLICANT Lewis, Martin K.

APPLICANT Mandrekar, Michelle
APPLICANT Mandrekar, Daniel
APPLICANT Modes, Richard B
APPLICANT Andrews, Christine A
APPLICANT Hartnett, James R
APPLICANT Gu, Trent
APPLICANT Gu, Ryan J
APPLICANT Gu, TRENCE Improved Nucleic Acid Detection
FILE REPREBREE: Improved Nucleic Acid Detection
CURRENT APPLICATION NUMBER: US/09/406,065

CURRENT FILING DATE: 1999-09-27
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Score 11.4; DB 1;

Patent No. 6379929
GENERAL INFORMATION:
APPLICANT: Burns, Mark A.
APPLICANT: Burns, David T.
APPLICANT: Donson, Brian N.
APPLICANT: Obenazio, John D.
TITLE OF INVENTION: CHIP-BASED ISOTHERMAL AMPLIFICATION
TITLE OF INVENTION: DEVICES AND METHODS
NUMBER OF SUGURNESS: 6
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            COMPUTER FALABLE FORM:
